DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, requiring a flexible wall.
 - II. Claims 8-18, requiring a pump line.
 - III. Claims 19-31, requiring a compressed air conduit and conveying conduit.
 - IV. Claims 32-40, requiring a pressure chamber with compressed air supply conduit.
 - V. Claims 41-50, requiring a flexible pressure membrane.

The inventions are distinct, each from the other because of the following reasons:

2. The essential feature of any of the above groups is not required by any of the remaining groups (see above)
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and the search required for one group is not required for the others, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1764

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
